Zavel Nymph Update 2026 07 29; The Zavel UFO

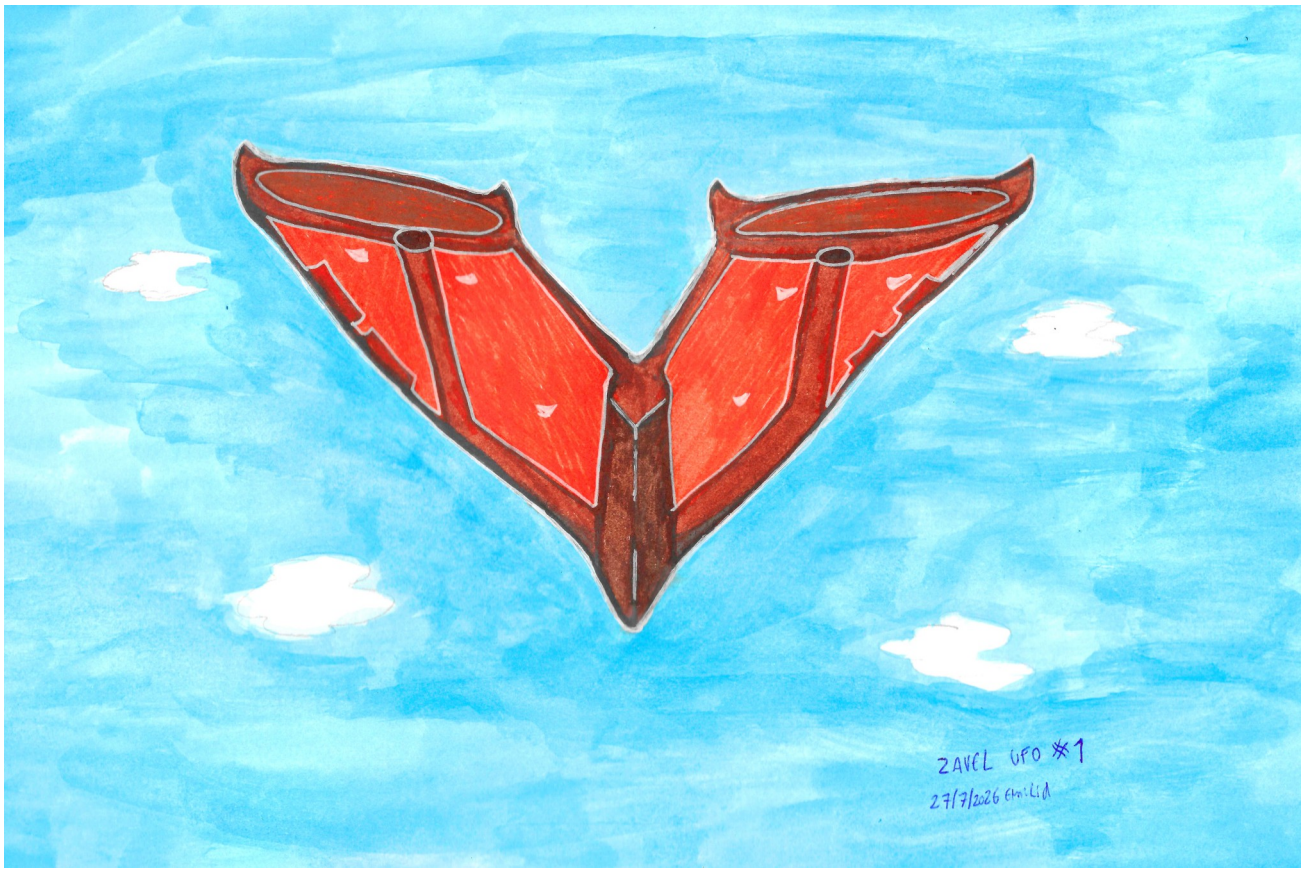
My friend once saw a strange creature and we called it the Zavel Nymph.
I will link the previous stories in the end.

So, my friend may have seen the Zavel Nymph again. It was Thursday 23 July, around midday, 12 o'clock. It was near the Zavelput, Waregem in Belgium. He was walking along the road, the Sint-Jansstraat; going south-west. He saw something flying towards the Zavelput, going north-west.
The object was completely silent. He was able to take one picture of it before it disappeared in the clouds. My friend did not feel in danger, but to be safe, he went back home as soon as possible.

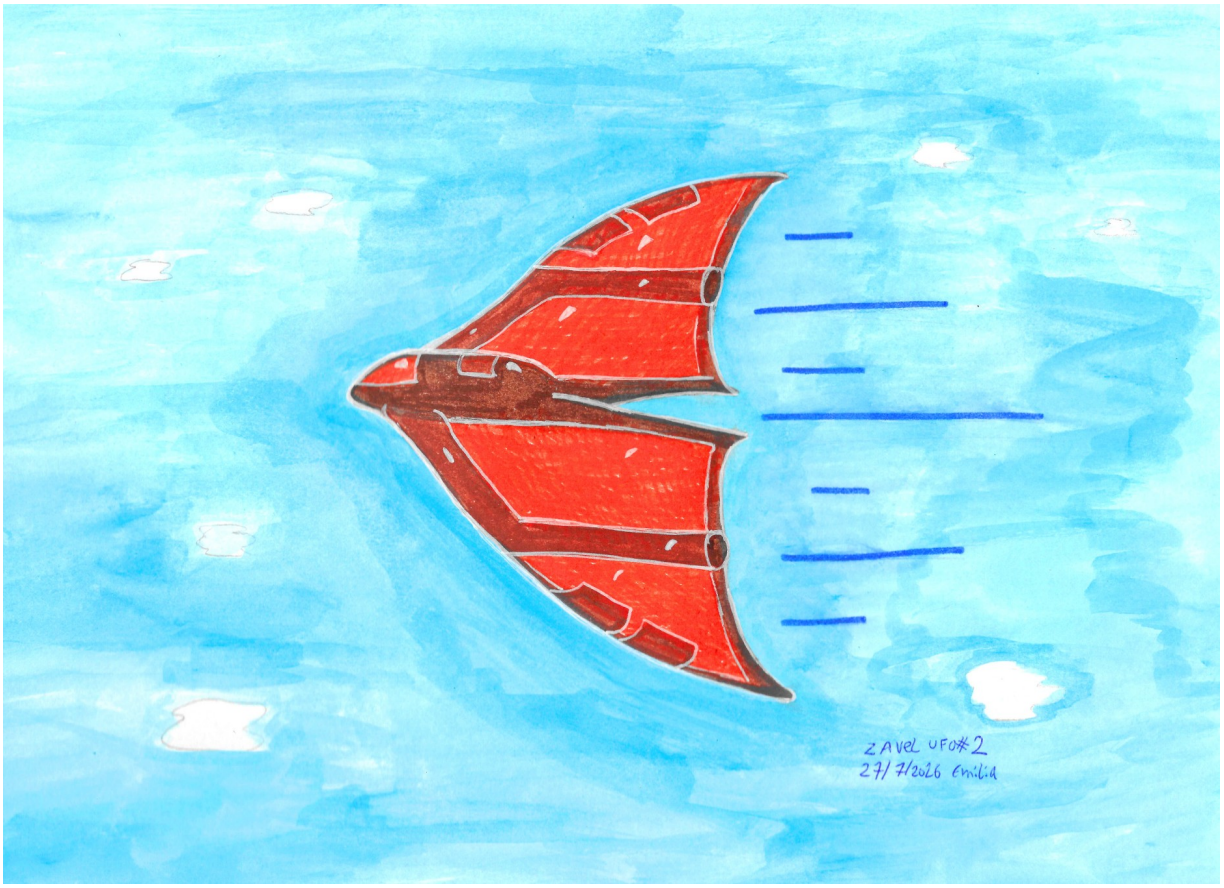
Afterwards, he told me about it, describing the object had two brownish tubes.
Again, I made several drawings using his photo and description as reference.
We don't know what it is and if its related to the Zavel Nymph, or the 'People of the Zavel Nymph'.
Could it have been the Zavel Nymph flying by itself?
Could it be the ship of this creature? Like a vehicle hosting many of its kind, or just this one Zavel Nymph.
I don't know if my friend is doing some elaborate prank either.
Could it have been a kite or a weather balloon? I have no idea. Any explanation is welcome.

Location: 50°52'32.4"N 3°19'37.3"E

Drawing 1
Could it be an object floating vertically like some balloon?

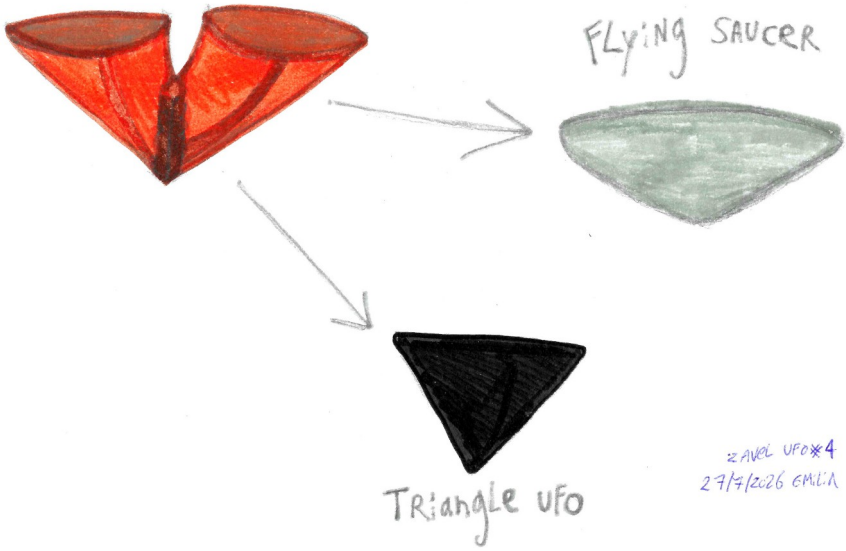


Drawing 2
Perhaps it's a craft flying horizontally, similar to a fighter jet.



Drawing 3
Maybe it is the Zavel Nymph flying by itself. However, the colours seem different.
The creature was black in colour, or was at least wearing something similar to a black cloak.
It may have removed its black cloak or put on some device allowing it to fly. Or it is able to change it's colour or shape. Maybe it could unfold its giant light-brown wings.

Drawing 4
The V-shape of the object is similar to a triangle or saucer-shape. There are many UFO reports including flying saucers and triangles. Even in Belgium, where this Zavel UFO was spotted, many triangle shaped UFOs were spotted around 1989 and 1990. Could this have been the same object?
Or is it a coincidence? If it is the same object it means it has lights as well.
Note, we received a letter from 'People of the Zavel Nymph' a while ago.
It contained a drawing of the 1989-1990 UFO.



What happened previously?
It started in February 2026. My friend saw a strange creature in the Zavelput, the same area and took pictures of it. I posted my story online and someone calling himself from the 'People of the Zavel Nymph' wanted to give us something. My friend and I, decided to meet this person in a busy public location. (yes I know this could have been dangerous). The stranger gave us an envelope.
It was filled with codes referencing the bible and UFO stuff. Note, this letter had a drawing of that triangle UFO, spotted around 1989. Did they know the Zavel Nymph is related to the triangular UFO?

Thanks for reading. What do you guys make of this?
